<b>Precautions</b>		
Physical Damage	In case the module is physically damaged due to any event, do not install and energize the module under any circumstances and contact an authorized technician	
Short Circuit	Ensure precautions to prevent short-circuit under all circumstances	
Galvanic isolation	When connecting to external devices ensure that galvanic isolation does not exceed 1500V	

Charge / Discharge Current	Under no circumstances must the charge / discharge current exceed 100A
Charging Voltage	Under no circumstances must the charging voltage exceed 54VDC for more than 60 seconds.
Charge Cycle	During charge cycle ensure never to exceed constant voltage of 54VDC and constant current of 100A
Series Connection	To connect modules in series, ensure all modules are at 100% SOC before connecting. Do not connect otherwise
Maximum number of modules that can be connected in series	18

Maximum number of modules that can be connected in parallel	No limit
Series – Parallel Connection	Modules cannot be connected in a series – parallel combination under any circumstances
